THE PEOPLE'S PARTY AND SILVER.

The Omaha platform is as unequivocally in favor of the free and unlimited coinage of silver as the platforms of the Minneapolis and Chicago Conventions are opposed to it. The silver issue is the paramount one in the present campaign. The Republican State Convention, held at Virginia City, referred to silver only, and the Democratic State Convention, held at Winnemucca, declared it to be the great issue of the day. The situation in Colorado is the same as in Nevada, and the Denver News, an able and consistent advocate of free coinage, says on the subject:

"It is clearly the interest and duty of all friends of free bimetallic coinage to unite in the support of General Weaver, the candidate of the People's party, for the Presidency. He is the only nominee for that office who believes in the money of the Constitution, and he stands upon a platform that is unmistakably pledged to the reinstatement of silver to the position of equality with gold which it occupied during more than eighty years of the Nation's prosperous growth.

"Mr. Weaver's opponents are both monometallists from conviction or interest, and upon the coinage question hold the views of the single standard money power, which has combined its forces for the permanent debasement of silver, that the volume of currency may be reduced and the rates of interest be advanced. The election of either of them would be disastrous to the cause of silver and to silver's producers to the extent that it is in the power of the Executive of the Nation to reinforce the single standard combination.

"Under these circumstances believers in bimetalism, to be consistent, must support General Weaver, while it would be suicidal for those whose material welfare depends upon remonetization to pursue any other course.

"Mr. Weaver represents some political demands about the wisdom of which there is wide divergence of opinion. There is no room for difference between the friends of silver about the meaning of the declaration upon that subject, of which the People's candidate is the exponent, and that fact should suffice for the miners of Colorado and all who are interested in the mining output and in the distribution of wealth which is inseparable from it.

"The News has heretofore stated, and still believes, that the cause which has consolidated the silver men of Colorado will be best subserved by a union of action in all the details of election, because that course would best preserve the compactness and efficiency of an organization that will be needed and should be maintained until the battle for silver shall end in triumphant victory.

"The relation which silver is to bear to the coinage is the supreme issue in the pending national election, and the entire goldbug press of the East concurs in this view of the situation. The money power has made it the issue and has scored a preliminary victory in each of the old party conventions.

"Having proclaimed in its authorized Eastern organs the transcendent importance of the financial issue in this canvass the money power, through a mercenary and subservient Western press, has undertaken to belittle that issue in the silver-mining region and magnify the claims which political parties have upon its adherents. In the East the single gold standard and the degradation of silver are brought to the front; in the West they are to be relegated to the rear. The people of the Rocky Mountain States are to be diverted from their most vital interests and go to generalizing about the tariff when they are not engaged in fanning the flames of partisan zeal and bitterness.

"Such is the goldbug programme mapped out for the silver mining section, and to make it good the few goldbug papers in Colorado and Nevada will be expected to direct all their efforts, utilizing the sentiment of party fealty to the utmost and using the party last where it will be politic to wield it.

"With the issue against silver thus signified by the power that has already robbed the Silver States of millions of dollars in depreciated values, it will be superfluous folly and an unpardonable sacrifice of self-interest and if State interest the people shall fail to present a substantially solid front to their merciless foe and the merciless foe of the producing population of the country."

THE PINKERTONS.

The two or three hundred armed men, furnished by the Pinkerton's to intimidate men who were asking for living wages for their labor at Carnegie's works in Pennsylvania, claim to have been sworn in as deputies by the Sheriff of Alleghany county. The Sheriff says they were not but the Carnegie people say they were. The question whether they were or not will be important in determining the responsibility for the murders at Homestead.

If the Pinkertons were simply invaders without license or authority, except that they were hired by the Carnegies to disperse the strikers, they can only be looked upon as murderers, whereas if they were sworn in as deputies by the Sheriff they had at least the color of law on their side, though the Sheriff acted in bad faith in making deputies of hired ruffians from Philadelphia, Brooklyn and other large cities.

Meantime the feeling against the Pinkertons, who were never very popular, is intensified in the West. The trades and labor assemblies of Chicago have retained an attorney to proceed against them for raising companies of armed men in violation of the statutes of Illinois. In the Kentucky Legislature a bill has been introduced prohibiting the employment of Pinkertons in that State. In Colorado Governor Rountt has refused to renew the licenses of the Pinkertons to operate, so their occupation will be gone in that State. In Wisconsin and Michigan laws have been enacted prohibiting the Pinkertons from organizing or assembling in those States. Their murderous conduct at Homestead has lacerated the whole country, and anti-Pinkerton legislation will probably be enacted in every State, save and except, perhaps, Pennsylvania, where monopolies hold sway and trusts are fostered by the ring which controls politics and determines what laws shall be enacted.

A Washington correspondent writes that ex-Boss Clarkson is getting himself laughed at. His proclamation explaining his relation to the Republican National Committee and the ticket is considered as silly a bit of egotism as was ever inflicted on the reading public, which knows that the only trouble with Clarkson is that he did not succeed in making a bargain with Mr. Harrison by which he could have remained at the head of the Committee.

Friends of the Administration are making it pleasant for the new Secretary of State, Mr. Foster, who occupies the place made vacant by the resignation of Secretary Blaine, by telling every one that the appointment was only given as a temporary makeshift. None of the big brainy Republicans cared to take the place.

The Building and Trades Unions of Chicago, some 20,000 strong, have telegraphed congratulations to the strikers at Homestead on the many stand they took against the Pinkertons, and a cannon has been sent the strikers from Texas.

The Silver bill has been reported favorably to the House by the Committee on Coinage, and the Committee on Rules has agreed to report a resolution setting apart Wednesday and Thursday for the consideration of the measure.

Hyattsville, Md., has adopted the single tax system. Building improvements are exempt, and a tax of 25 cents on the \$100 on land values is assessed.

A \$60,000,000 FIRE.

St. Johns, N. F., July 9.—The fire which broke out here yesterday is still burning. Six hundred buildings have already been destroyed, and the loss will reach \$60,000,000. Fifteen thousand people are homeless and destitute. All the finest buildings in town have been destroyed and it is thought many lives are lost. The English cathedral, considered to be the finest piece of gothic architecture on this continent, and which has been building for fifty years is also ruined. The people and fire department are paralyzed and block after block is burned with no attempt being made to save them. Thieves have entered deserted houses and looted them. The fire this morning has broken out among the fine residences in town and it looks as if the whole city will be destroyed. The wires are down and there is no communication with the outside world.

THE LOSS INCREASING.
HALIFAX, N. S., July 9.—At 30 minutes of 8 to-night telegraphic communication with St. Johns was restored. The first dispatch received after the wires were again in working order stated the loss by fire was placed at twenty millions.

Baseball.
SAN FRANCISCO, July 9.—Los Angeles, 9; San Francisco, 4.

Remarkable Restoration.

An Albany dispatch says: "In July 1888, the brilliant artist, John Price, upon serving a nineteen year sentence at Dannemora, slipped out behind P. K. Dedrick just as he left his carriage on the front of the Farmers and Mechanic bank and extracted from the bank a package containing \$35,000 in negotiable bonds. A few days ago the bonds were received by ex-District Attorney Hugh Reilly. The package was intact, and the accumulated interest makes them worth about \$43,000. There is no clue to whence they came, except that they were sent from New York City. The mystery lies in the fact that they were returned at all, as they were negotiable."

President Roberts, of the Pennsylvania, stated that last year that railroad carried 5,500,000 tons of coal monthly. In ten years there has been an increase of 500 per cent. in the carriage of coal.

A Twenty Million Dollar Fire at St. Johns, Newfoundland.

THE FREE COINAGE SITUATION.

Cleveland Offers a Good Objection—Quay's Amendment—Proceedings of the House.

TERRIFIC EXPLOSION.

The Berkeley Powder Mills Explode, Causing Great Damage and Loss of Life.

SAN FRANCISCO, July 9.—The bodies of the three men who were killed in the powder works explosion were recovered. Dickinson was in charge of the nitro-glycerine house, located near the wharf and the other men were in the nitro-glycerine washing house, located near by. Their bodies were found in the debris terribly mangled. Dickinson's arms and legs were broken and twisted and his eyes were blown out. The others were badly mutilated. Bowen's body was thrown into the water close at hand, where it was found and taken up by his comrades. He had been married not quite a year. Dickinson was twenty-five years of age and single. The other unfortunate was twenty-seven years old and also unmarried.

Later accounts confirm the list of dead to the three whites who were in the nitro-glycerine house, but from the frightened Chinamen enough is learned to give some little color to the statement that all of the persons in the packing house did not escape.

Where the magazines were located the earth is torn up in a fearful manner. The packing house, being close by is buried under a mass of earth and it is possible that a search will be made to ascertain if there are any bodies in the ruins. The officials claim all the Chinamen are killed the number is unknown. The outside estimate is from nine to twelve. Several were badly hurt.

Later dispatches from the scene of the explosion show that the early reports were greatly exaggerated so far as the loss of life is concerned. Considering the terrific force of the explosion the loss of life is very small. It is believed it was confined to the three white men, John Bowen, Wallace Dickinson and Charles Gubelridge. Some Chinamen may have been killed but it is not known positively. Early this evening the officers of the Giant Powder Company went to the scene soon after the explosion occurred, and as they regarded the wreck of every structure they expressed gratification at the small loss of life. They say it is almost impossible to estimate the loss but that \$200,000 will probably be an outside figure for the damage to the powder works.

The San Francisco Chemical Works owned by E. Judson and J. L. Shepard, were almost completely destroyed and the loss is not far from \$150,000.

Upon a hill not one hundred yards from the nitro-glycerine house which exploded this morning, there were forty-two white men employed and beyond and around the winding road that leads to the magazines and boarding houses were forty-three Chinamen busily at work in the packing houses. At the first explosion at the nitro-glycerine house they ran for safety, and to this the survivors owe their lives. The nitro-glycerine house was the first to explode. It was on the brow of a hill facing the bay. Here there were, according to the statements of men employed, about 2,000 pounds of the deadly explosive. Only one man, Dickinson, so far as known, was here at the time.

The terrific concussion of the nitro-glycerine exploded the material in the washing and mixing houses near by and the sheds took fire immediately. Burning brands were thrown high in the air. Some struck the sulphur store house out at the end of the wharf and others, presumably, crashed into the big magazine where the giant and black powder was stored. These magazines went next. First the giant powder store house exploded. Here there were fully 300,000 pounds of giant powder and of dynamite. The store house was built deep in the side hill, with only a small structure projecting fastened with iron doors. Only a vast hole about hundred feet across remains to mark the spot. The concussion of the explosion of this magazine exploded the black powder magazine about 300 yards east of this. Between them were packing houses where Chinamen were employed, but they fled at the first alarm. Fully 300,000 pounds were stored in the black powder magazine. It was built like the other magazines, half underground. East of it, separating it from the sulphur acid storage tanks and acid works and boarding houses. Beyond was a high embankment thrown up for the purpose of protection. The explosion of this black powder was terrific. It shattered everything on the peninsula, which the explosion had left. It was the force of this explosion which was felt most in San Francisco. Windows were broken and chimneys toppled over all over Berkeley as well as in San Francisco and Oakland.

The latest reports received this evening from the scene of the explosion at Highlands show that it has been definitely ascertained that five persons lost their lives, the three white employees and two Chinamen. It is believed this is the extent of fatalities. A number of Chinamen and several white persons were more or less seriously injured. It is believed the damage in this city from the breakage of glass windows will reach \$10,000.

HEALING, Cal., July 9.—The explosion at Highlands this morning was felt distinctly here, a distance of over sixty miles. Doors and windows were shaken.

Free Coinage Situation.
WASHINGTON, July 9.—During the afternoon the Committee on Rules adopted the following resolution, which will be reported to the House next Wednesday: That immediately upon the adoption of this resolution the House proceed to the consideration of Senate bill 51 (Free Coinage bill), and if said bill shall not be disposed of on said day then consideration thereof shall be continued during the next legislative day. Should the rule for the consideration of the bill be voted down the advocates of the measure will surrender. Should it be adopted they will expect the opponents to move that the whole question be postponed until September. If the motion to postpone be defeated the anti-silver men will resort to filibustering and then the good offices of the Committee on Rules will again be invoked to bring in a closure rule. All Democrats of the committee are adverse to bringing in such a rule and will only do so when they are absolutely compelled by force of circumstances, such as a request from the majority of the total Democratic membership of the House. The Republicans are still reticent and their position on the question is an unknown quantity. If they see a chance for defeating the bill they will do so, but they will not agree in advance to help either faction of the Democrats. A careful poll of the House was made to-day by Williams of Mississippi, which convinces him that if the bill comes to a direct vote on its merits it will be defeated by a majority of from 4 to 8, but the arrival of absentees may change the estimate. The opponents believe, however, there will be a much larger majority against the consideration. Killgore, a member of the Coinage Committee, voted in committee against a demand for the previous question on a motion to report the bill as it came from the Senate. He did so, he says, because he believes the bill defective in at least three particulars and ought to be amended. The most important defect is that it repeals the law making about one hundred million dollars in treasury notes redeemable in coin and legal tender as well.

A Good Objection.
BOSTON, July 9.—Mrs. Cleveland recently received a letter from Mary Frost Ormsby of New York informing Mr. Cleveland of the formation there of a "Frances Cleveland Influence Club," composed of the wives, sisters and daughters, of Democrats to do campaign work. The following letter has been sent in reply:

GNAT GABLES, Boston, July 6, 1892.

My Dear Madam:—Mrs. Cleveland referred to me your letter informing her of the organization of the "Frances Cleveland Influence Club." It is by no means pleasant to dissent from the methods which friends adopt when their efforts not only demonstrate their friendliness, but when they also seek to subvert the public good, and are therefore engaged in patriotic service. It is, however, impossible for us to approve of the use of Mrs. Cleveland's name in the designation of clubs designed to do political work, and trust you will not undervalue our objection, because it rests upon sentiment that the name now sacred in some circles as wife and mother may well be spared in the organization and operation of clubs created to exert political influence.

Yours very truly,
GROVER CLEVELAND.

Quay's Amendment.

WASHINGTON, July 9.—In the Senate to-day Quay offered an amendment to the bill providing for the coinage of ten million sovereign half-dollars in aid of the World's Fair. The amendment requires the closing of the World's Fair on Sunday.

House Proceedings.

WASHINGTON, July 9.—The postoffice appropriation bill and the pension appropriation bill were passed. The House then adjourned, leaving the legislative appropriation bill unfinished.

Seats now on sale at Plummer's Drug Store.

A Want Supplied.
I wish to most respectfully inform the people of Reno who can appreciate a good shave, that I am now running the barber shop in Chase & Boynton's building, opposite the First National Bank and in the future my price of shaving will be 15 cents. Give me a call and test the delicacy of my steel. I have come to stay and want the world to know it.
Respect, your most obedient servant,
W. J. LUSHMAN,
Late of San Francisco, Cal.
A "G" Social.

A Curiously, yet Comprehensively Conducted "O" Collection, Conductive to Charity. (Charitably Contributed.) To be given at the M. E. parsonage. Tables set on the lawn. Wednesday evening, July 13th. Come and "O" (see).

Peculiar

Many peculiar points make Hood's Sarsaparilla superior to all other medicines. Peculiar in combination, proportion, and preparation of ingredients, Hood's Sarsaparilla possesses the full curative value of the best known remedies of the vegetable kingdom. Peculiar in its strength and economy—superior to all other medicines of its kind. Peculiar in its medicinal effects. Hood's Sarsaparilla accomplishes cures hitherto unknown, and has won for itself the title of "The greatest blood purifier ever discovered." Peculiar in its "goodness" home—there is now more of Hood's Sarsaparilla sold in Lowell, where than of all other blood purifiers. Peculiar in its record of sales abroad. No other preparation has ever attained such popularity in so short a time, and retained its popularity of people so steadfastly. Do not be induced to buy other preparations, but be sure to get the Peculiar Medicine.

Hood's Sarsaparilla
Sold by all druggists. Prepared by
J. C. HOOD & CO., Lowell, Mass.
